## **REGARDING APPOINTMENTS AND RESCHEDULING**

*Because of doctor and facility availability, we may not be able to reschedule an appointment as quickly as it was scheduled the first time.*

*We strive to schedule your procedure with utmost consideration of your scheduling needs. By getting your input when we schedule the procedure, we can avoid conflicting with something you may already have scheduled.*

*Scheduling your procedure is a complicated process. We need to coordinate the doctor's schedule, the availability of the procedure rooms at the facility, and their staff's availability.*

*We understand that conflicts arise that may require you to request your procedure being rescheduled. This rescheduling process is quite involved and time consuming for our staff and the other people involved. We ask you to understand this, and limit requests for rescheduling to true emergencies.*
